## WORK EXPERIENCE

### Mobile Tech Lead

#### Banco de Crédito en Inversiones Chile

07/2021 - Presente

Santiago, Chile

##### Achievements/Tasks

- Lead migration initiatives to multi-module architecture that allowed our teams to reduce our time to market
- Implement DevSec strategies for both development platforms
- Optimize our Android and iOS CI-CD pipelines to allow for faster build times
- Train our mobile developer teams on best testing practices, multi-module development, DevSec and design patterns

### Senior Android Developer

#### Adevinta

03/2020 - 07/2021

Santiago, Chile

##### Achievements/Tasks

- Successfully designed and applied a high impact refactor strategy that allowed my team to efficiently morph a monolith architecture into a multi-module architecture.
- Improved my team's work environment with the introduction of soft skill oriented practices that allowed to boost the individuals engagement with the company by 21%.

### Senior Android Developer

#### Concrete by Accenture

04/2019 - 03/2020

Santiago, Chile

##### Part of Accenture

##### Achievements/Tasks

- Build a Bank application under the principles and methodologies established by the company, such as SOLID, Clean Architectures, and others.
- Successfully designed and implemented an scalable and multiservice tagging module for tracking the app metrics.
- Analyze, design and/or develop best practice business changes through technology solutions.

### Android Developer

#### Yapo CL SpA

01/2018 - 04/2019

Santiago, Chile

##### Part Schibsted

##### Achievements/Tasks

- Build the YapoCL in-house application under the principles and methodologies established by the company, such as SOLID, Clean Architectures, and others.
- Successfully integrated CI/CD using TravisCI featuring Unit tests, UI Tests using a remote device farm, E2E testing with Saucelabs (Appium), Slack reporting, Google Playstore upload and automatic release to alpha track.
